WHAT IS VULCAN OS?

# The operating system for heat treating shops.

Vulcan OS replaces the spreadsheets, paper travelers, and disconnected tools that run most shops today. Quoting, work orders, live production tracking, quality data, certifications, shipping, invoicing, and maintenance all live in one web-based system, so everyone from the front office to the furnace floor works from the same, up-to-date information.

New: a built-in AI assistant for your whole team

NEW · AI SHOP ASSISTANT

## Just ask Vulcan OS.

A help assistant is built into every screen. Ask a question in plain English and get an answer in seconds.

- **How-to help:** step-by-step answers, like how to turn a quote into a work order.
- **Live work order answers:** status, where each batch is, what's blocking a step, what's on hold or ready to ship.
- **Safe by design:** read-only, and it only sees your own company's data.

SAMPLE CONVERSATION

What's on hold for Spinka?

*Finding On Hold work orders for Spinka...*

Spinka-O'Keefe Co. has one: WO 200021 (PO-10010, qty 142), at step 1, Contract Review. To release it, open the work order, click Edit and change the Status.

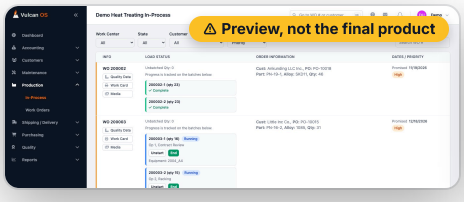

Why can't I end Hardness Inspection on 200034?

Batch 200034-2 has no quality data yet. In In-Process, open Quality Data, click Add Result and pick 200034-2 as the Batch.

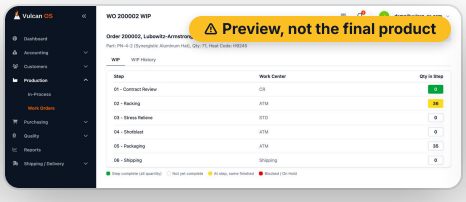

## Everything from quote to cash

- **Quoting**
  Line-item quotes with worksheets and PDFs; convert a line into a work order in one click.
- **WIP Visibility**
  Color-coded view of where every piece is, plus a full per-load audit trail.
- **Invoicing & Profitability**
  Invoices, deposits and job margin by customer, process and work order.
- **40+ Reports**
  Run on screen or export to PDF or Excel, from open orders to cost center P&L.
- **Work Orders & Routings**
  A progress strip and one clear next action; steps customizable per order.
- **Quality & Certifications**
  Control plans, out-of-spec approvals, calibrations and quality gates; certs built from real data.
- **Customers, Parts & Vendors**
  Contacts, addresses, parts, purchase orders and vendors in one place.
- **Preventative Maintenance**
  Scheduled work orders, on-demand requests, outage notices, costs and downtime.
- **Live Production Screen**
  Start/end steps, split loads into batches, assign equipment, print barcoded work cards.
- **Shipping & Bills of Lading**
  Ship certified loads, track receipt, print or email shippers and BOLs.
- **Dashboards & Goals**
  A needs-attention list, KPIs, and goals and budgets by cost center.
- **Multi-Company & Roles**
  Parent-company reporting across shops, and access by role.

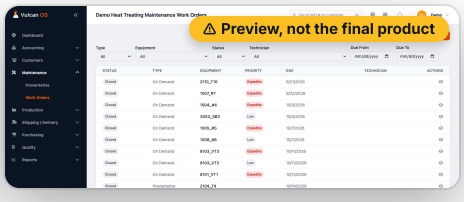

## A look inside

**In-Process screen.** Every open load with Start/End controls, batches, and quality gates.

**WIP tracking.** See what's finished, in progress, or on hold at every routing step.

**Maintenance.** Scheduled and on-demand work orders with costs and downtime.

Screenshots and the sample conversation use sample data and are not the final end product. Features and appearance may change.

## Interested? Let's discuss.

We'd love to hear about your shop and show you what Vulcan OS can do.
